

**SKILLS:** React, Redux, Ruby, Rails, JavaScript, SQL, HTML, CSS

## PROJECTS:

**AviQuest** *MongoDb, ExpressJS, ReactJS, NodeJS, Redux*

[live](#) | [github](#)

Task, and habit tracking application that gamifies completing tasks

- Deployed and implemented the backend to store user and task information applicable to the logged in user by leveraging ExpressJS, NodeJS, MongoDB atlas, and mongoose.
- Ensured user privacy and autonomy by building out backend and front end authentication for persisting secure user sessions utilizing JWT-Tokens.
- Constructed backend routes and controllers to guarantee core functionality and allow users to add and remove tasks as needed, improving application efficiency by reducing fetch requests

**Cadence** *Ruby on Rails, ReactJS, Redux*

[live](#) | [github](#)

*Fitness tracker, with a social networking twist inspired by Strava*

- Built out a rails backend that integrated with ReactJS front end with full user authentication, and Cross Site Request Forgery Protection, and session tokens to create an optimized user experience..
- Developed user autonomy by linking users with their activities, ensuring only the user could edit or delete their own activities.
- Implemented redux to manage application state, to create a highly scalable frontend end by harnessing Redux's ability to simplify React components and manage data across the application.

**Extinguish** *Javascript, HTML, CSS*

[live](#) | [github](#)

*Playable Javascript game inspired by the Lightsout handheld game from the 90's*

- Designed a playable grid harnessing Javascript DOM manipulation to interact with HTML and CSS and render web pages.
- Wrote logic to set grid positions using bitwise operations to set predefined levels as well as randomly generated levels.

## EXPERIENCE:

**Licensed Loan Expert**

*Simplist Mortgage*

Sept 2021 - May 2022

- Successfully managed an active pipeline of over 50 clients per month, consistently originating new business while keeping existing applications on track to close within strict deadlines and maintaining 5 star client ratings.
- Collaborated closely with product and engineering teams to implement new production features to allow sales C
- Coordinated between banking partners and stakeholders to deliver services in an efficient and timely manner

**Sales and Operations Manager**

*Go To Moving And Storage*

May 2015- Sept 2021
